

CARE & USE - HANDMADE TERRACOTTA

The GOMMAIRE ceramics are meticulously crafted from terracotta clay, carefully shaped, and treated to achieve a beautifully patinated finish. The authentic grey and fume terracotta finish can vary from light to dark because of its handcrafted properties. This product is carefully handcrafted, resulting in subtle variations and imperfections that contribute to its distinctive beauty and uniqueness.

After unpacking, please clean the item with a damp cloth and polish it with a microfiber cloth afterward. Our terracotta is not 100% waterproof. Therefore, we recommend always using a protective inner layer or placing a protective basin when using water.

Due to their limited weather resistance, it is advisable to exclusively use the Gommaire ceramics collection indoors.
